CLIENT CARE CARD

Loving Your New Hair

A few simple habits keep your system comfortable, secure and beautiful between visits.

Daily care

- Brush daily with a wet brush, and keep one in your purse
- Wash with sulfate-free products
- Never leave it wet. Dry completely
- No hairspray or dry shampoo
- Sleep in mulberry silk
- Ponytails no higher than the occipital (the curve at the back of your head)
- Itchy? Tap, never scratch

Maintenance

Book a maintenance visit every **4 to 6 weeks**. Skipping maintenance can affect the comfort, look and life of your hair and your own hair underneath.

When to call

Call your stylist: your hairline is coming unstitched, or anything hurts.

Not a 911: a weft end lifting, or one bead out. Mention it at your next visit.
