MESH INTEGRATION AT STYLE FOR LOVE

Thinning hair? You have options.

Natural-looking, comfortable hair solutions for women with hair loss, from Beki Pubill, a stylist trained in the Elevate mesh integration method.

What is it?

Mesh Integration and Meshless systems blend a custom hair piece with your own hair, so it looks and moves like you. No glue, and you leave looking like yourself again, only fuller.

Mesh Integration

- A breathable mesh base that your own hair is pulled through
- Great for more advanced thinning on top
- Secure, lightweight and comfortable

Meshless

- No mesh base; attached with a small grid of beads
- Great for early or partial thinning
- Very light, easy to wear every day

Who is it for?

Women with thinning on top, a widening part, or hair loss from things like alopecia, hormones, medications, stress or treatment. At your consultation we will decide together which option fits you best.

What to expect

- **Consultation:** we look at your hair, talk about your goals and pick the right system and color.
- **Your install:** your system is matched, attached, cut and blended to your own hair.
- **Maintenance:** visits every 4 to 6 weeks keep it secure and looking fresh.

Can insurance help?

Often, yes. If you have a medical diagnosis for your hair loss (for example alopecia, lupus, trichotillomania, chemotherapy or medication-related loss), KAM Hair Loss Services can check your benefits and file the claim for you. There is a $197 insurance service fee. You can also use your HSA or FSA card for your hair and maintenance visits. Coverage depends on your plan and is not guaranteed.
